

# FUSION

- quando il jazz incontra il rock -

Fusion è un genere musicale emerso alla fine degli anni sessanta e primi settanta che combina elementi di jazz, rock e funk.

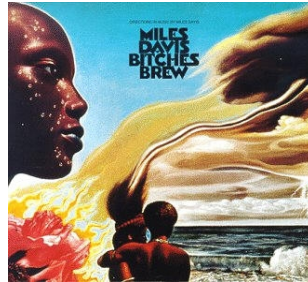

Molti critici ritengono che le prime incisioni fusion siano state **Hot Rats** di **Frank Zappa** (1969) e il doppio album **Bitches Brew** di **Miles Davis** (1970). Ma a caratterizzare nel modo migliore il termine "fusion" è il celebre **Spectrum** di **Billy Cobham** considerato pioniere poiché è il primo album fusion con un chitarrista rock, **Tommy Bolin**.
